

ARIS[®] Academic Readiness Intervention System

Stages Learning has earned a loyal following among teachers, a deep relationship with the Harvard Graduate School of Education, and a growing roster of districts turning to us to build their capacity to serve, not just students with autism, but all students with cognitive or language delays. Our Language Builder: Academic Readiness Intervention System (ARIS) weaves together **evidence-based standards for quality autism education, whole child development, and alignment to national and individual state standards.**

ARIS offers a complete solution for better supporting kids in our classrooms who have an **autism diagnosis, cognitive disabilities, language delays, or learning readiness challenges.**

We know that hiring and retaining highly trained special education teachers is harder than ever, so ARIS was designed to **ease teacher burden while building teacher capacity.** Our step-by-step scripted lessons and rich professional development offerings will elevate teacher expertise and effectiveness leading to whole child gains for your students.

ARIS is the most comprehensive solution on the market.

The ARIS curriculum includes **202 lessons across seven learning categories.** The result is support for a broad range of foundational skills often overlooked when working with these populations.

Components include detailed, descriptive lesson plans, compliance guidance, data tracking and school-home communication tools, digital supports, all physical materials needed to implement lessons, and more! Plus, the system includes **assessment tools** to pinpoint the exact starting point for each child and develop a personalized learning path to maximize success.

How to Convince your School to Purchase ARIS Resources

Do you think ARIS is a great fit for your school? Use this email template to help open the conversation with your supervisor.

Subject: ARIS from Stages Learning

To: [supervisor email]

Hi [supervisor],

I wanted to share with you something that I think would be really helpful for my students. I've had the opportunity to learn more about Stages Learning and their Academic Readiness Intervention System - ARIS, and how it aims to solve many of the challenges we face as special education teachers.

ARIS comes with everything I need to implement 202 scripted lessons focusing on the following areas:

- Approaches to Learning
- Language
- Functional Routines
- Motor Skills
- Social Emotional Learning
- Math Readiness
- Reading and Writing Readiness

ARIS is aligned to VBMAPP, ABLLS-R, HeadStart, [our state standards], incorporates evidence based instructional practices, includes data tracking sheets, and provides generalization and whole-child learning ideas to help maximize student learning throughout the school day.

I am excited about ARIS because it will let me spend less time searching, creating, and organizing materials, and more time teaching and engaging with students. Having Stages Learning in my classroom is like having an extra teacher in that the detailed, scripted lessons allow me to optimize paraprofessionals by enabling them to deliver instruction with confidence.

Stages Learning also provides Professional Development and ongoing support to ensure we have the training and information we need to implement ARIS with fidelity. They also provide free open office hours every week over Zoom!

I strongly recommend looking into ARIS for my classroom. More information can be found on the website: stageslearning.com/aris

I am happy to set up a meeting for us to talk with STAGES to learn more. Thank you for your consideration!

Sincerely,

[your name]
